02

Energy supply in South Africa

A system trapped between monopoly and regulations

Eskom: State owned corporation, supply and regulation of energy

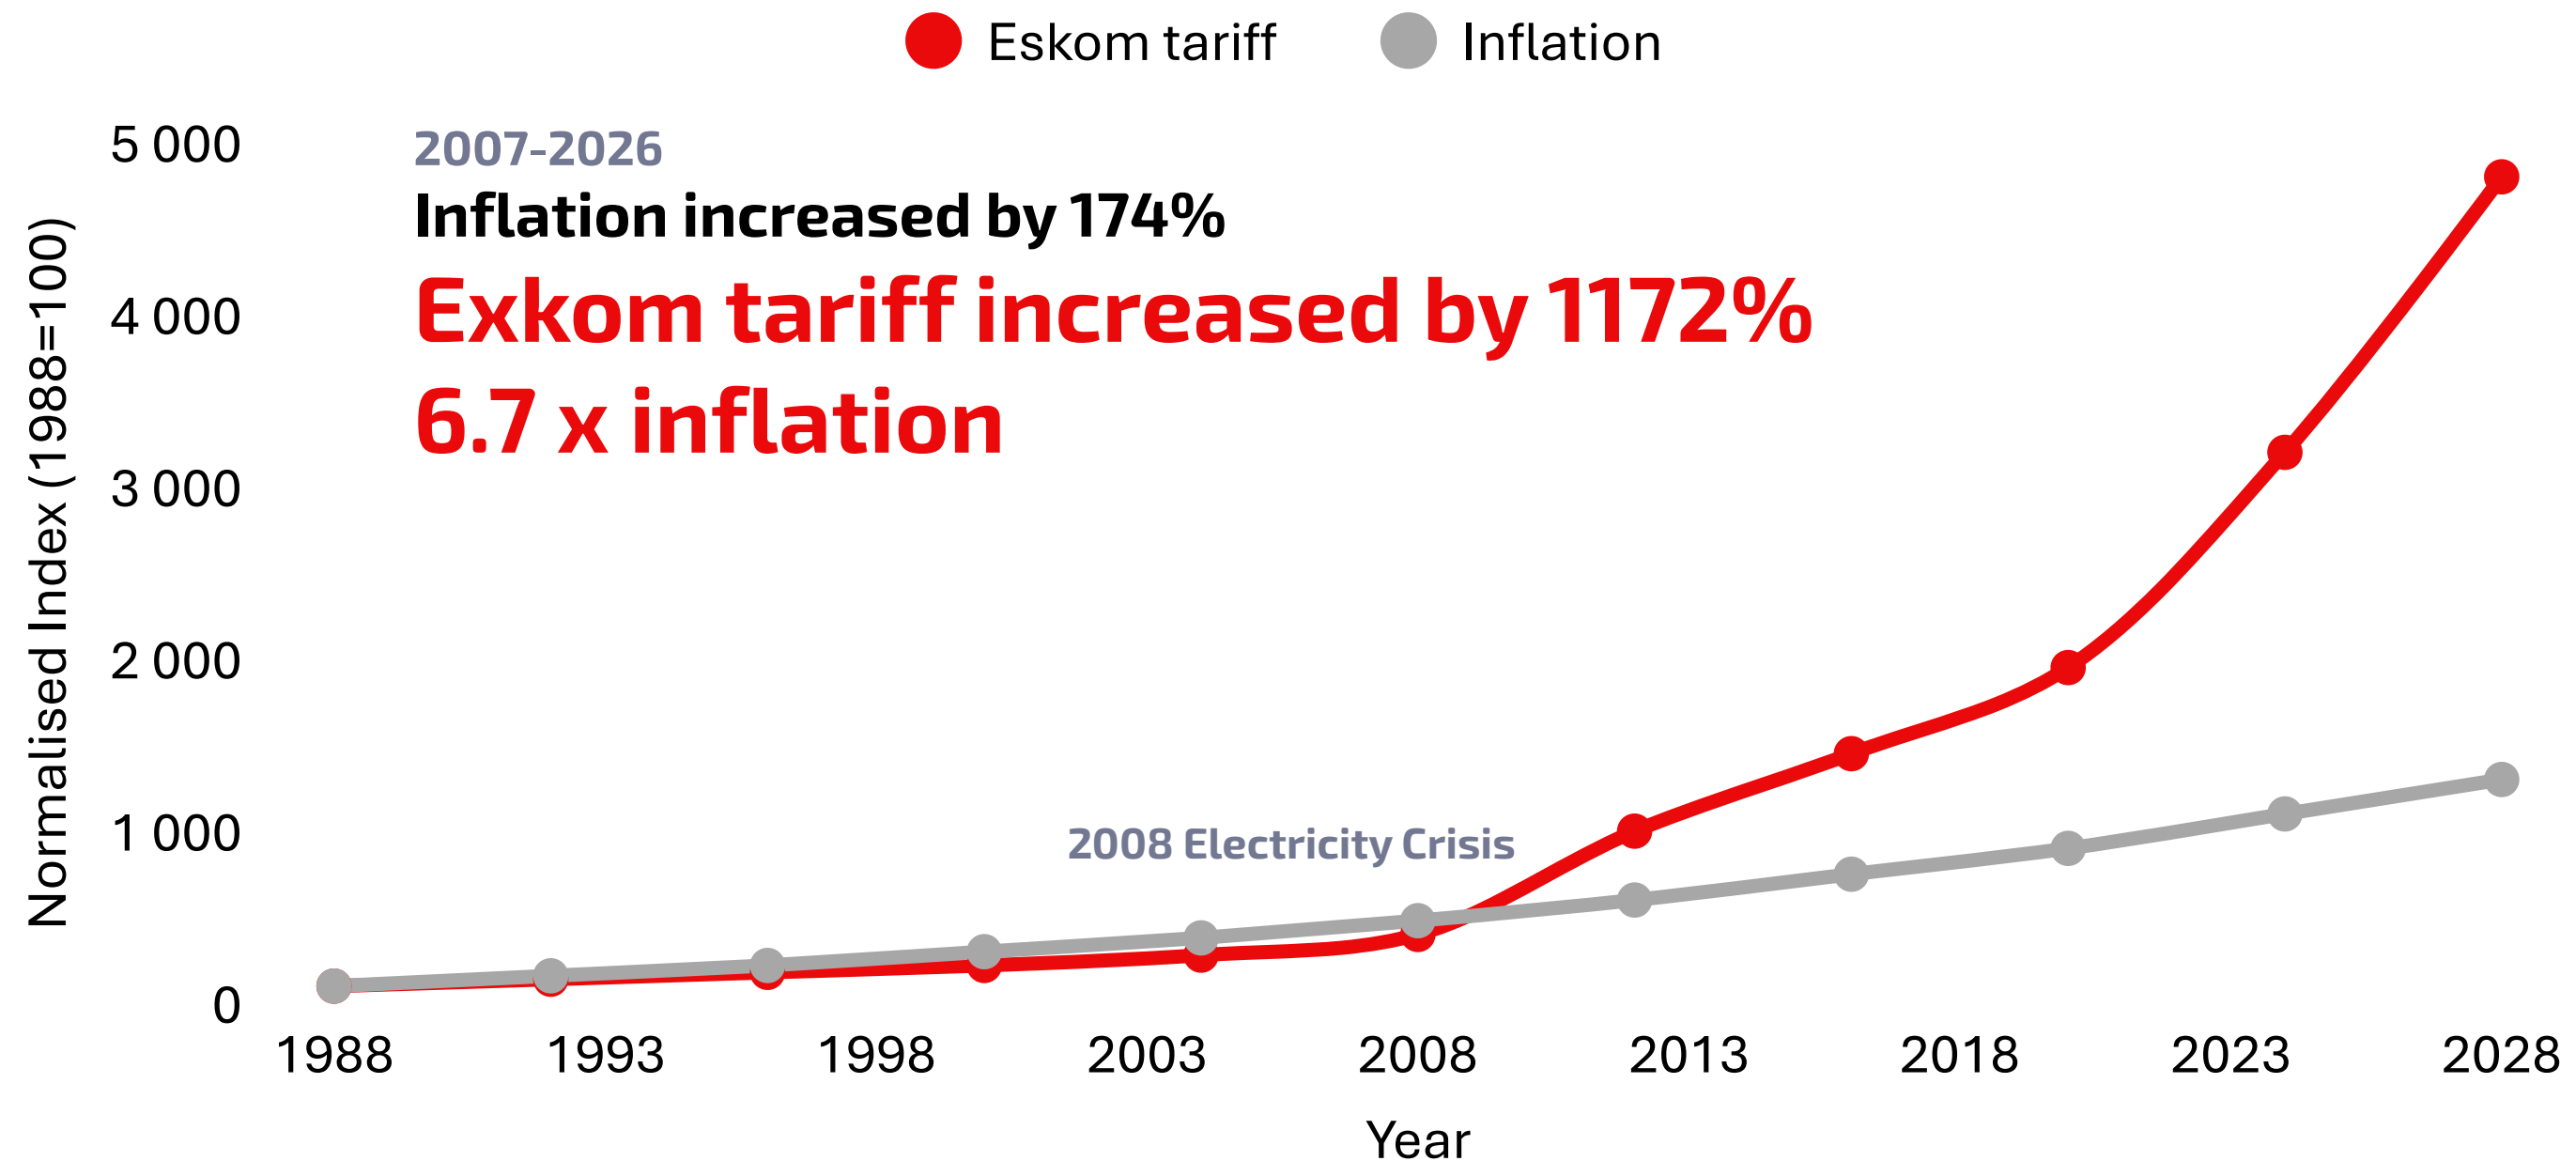

NERSA: National Energy Regulation of South Africa

Rising costs

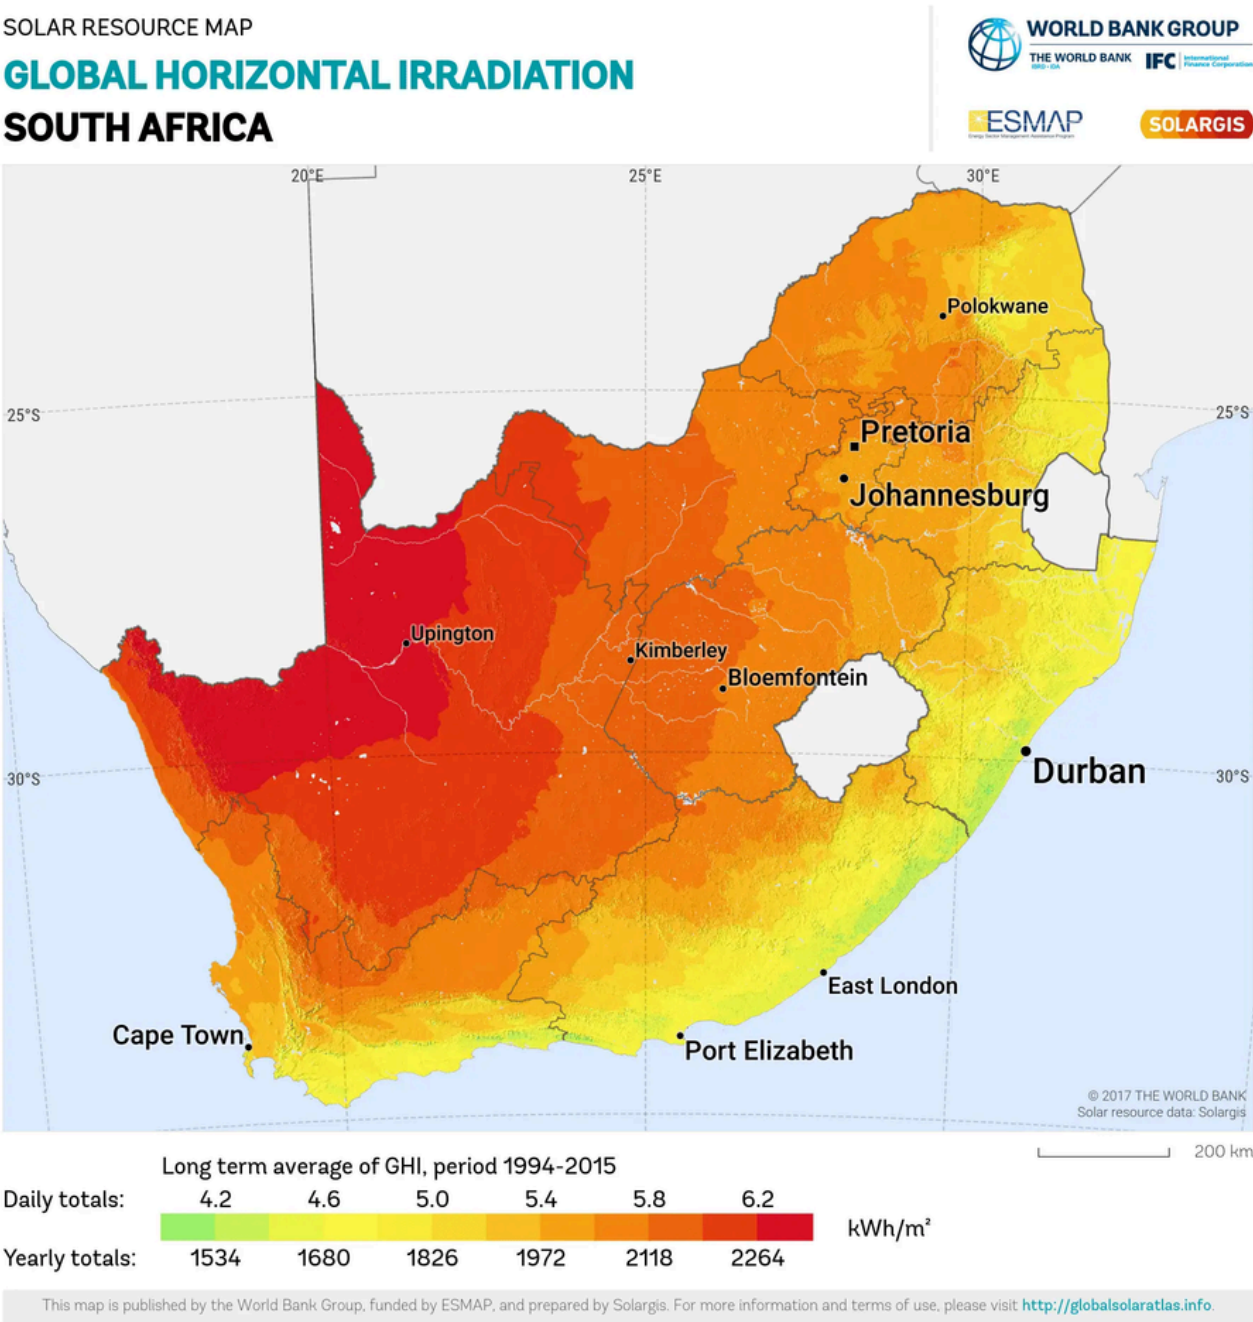

Eskom Average Tariff vs. Inflation (CPI)

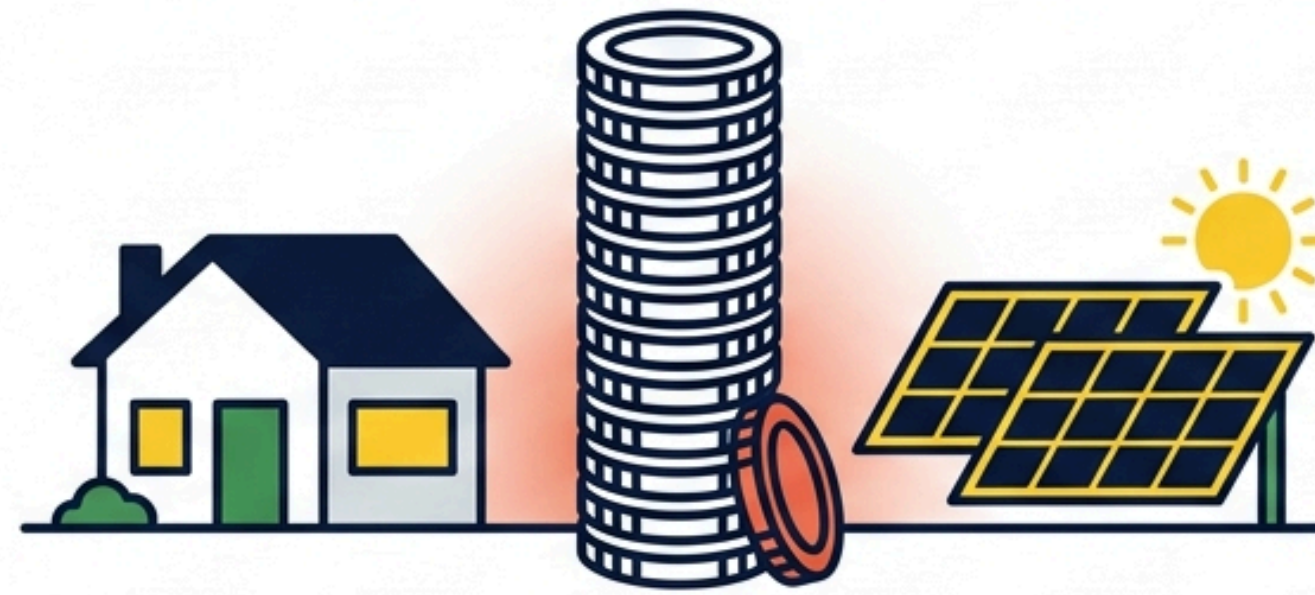

PowerOptimal (2026), “2026 update: Eskom tariff increases vs inflation since 1988”

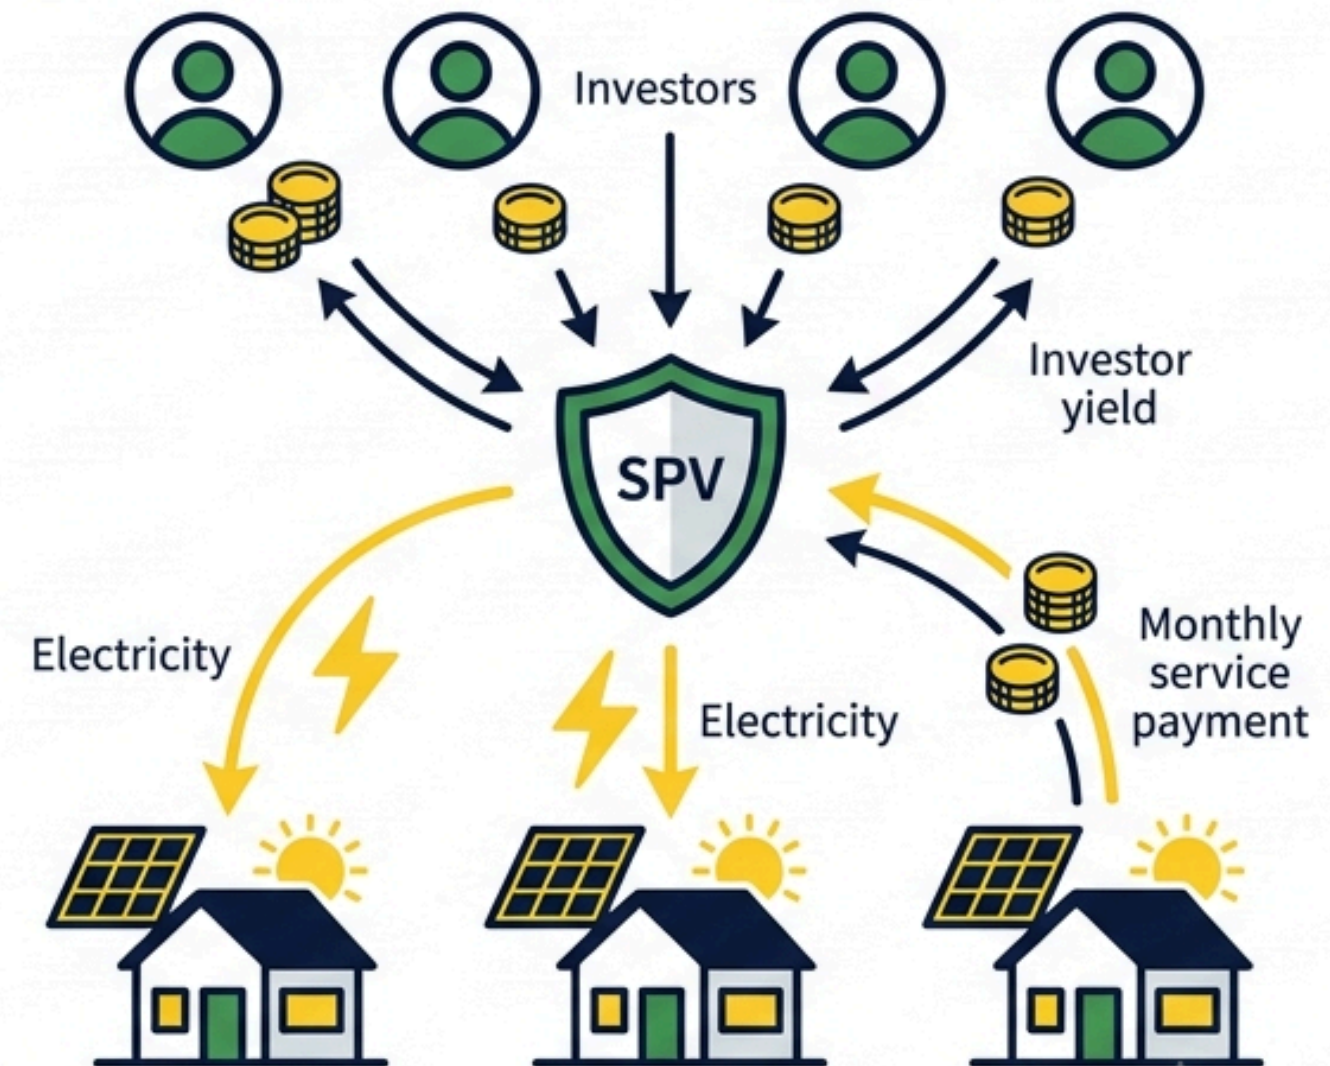

Sunlight as an undervalued resource

Turning *Solar CapEx* into a *Crowdfunded Venture*

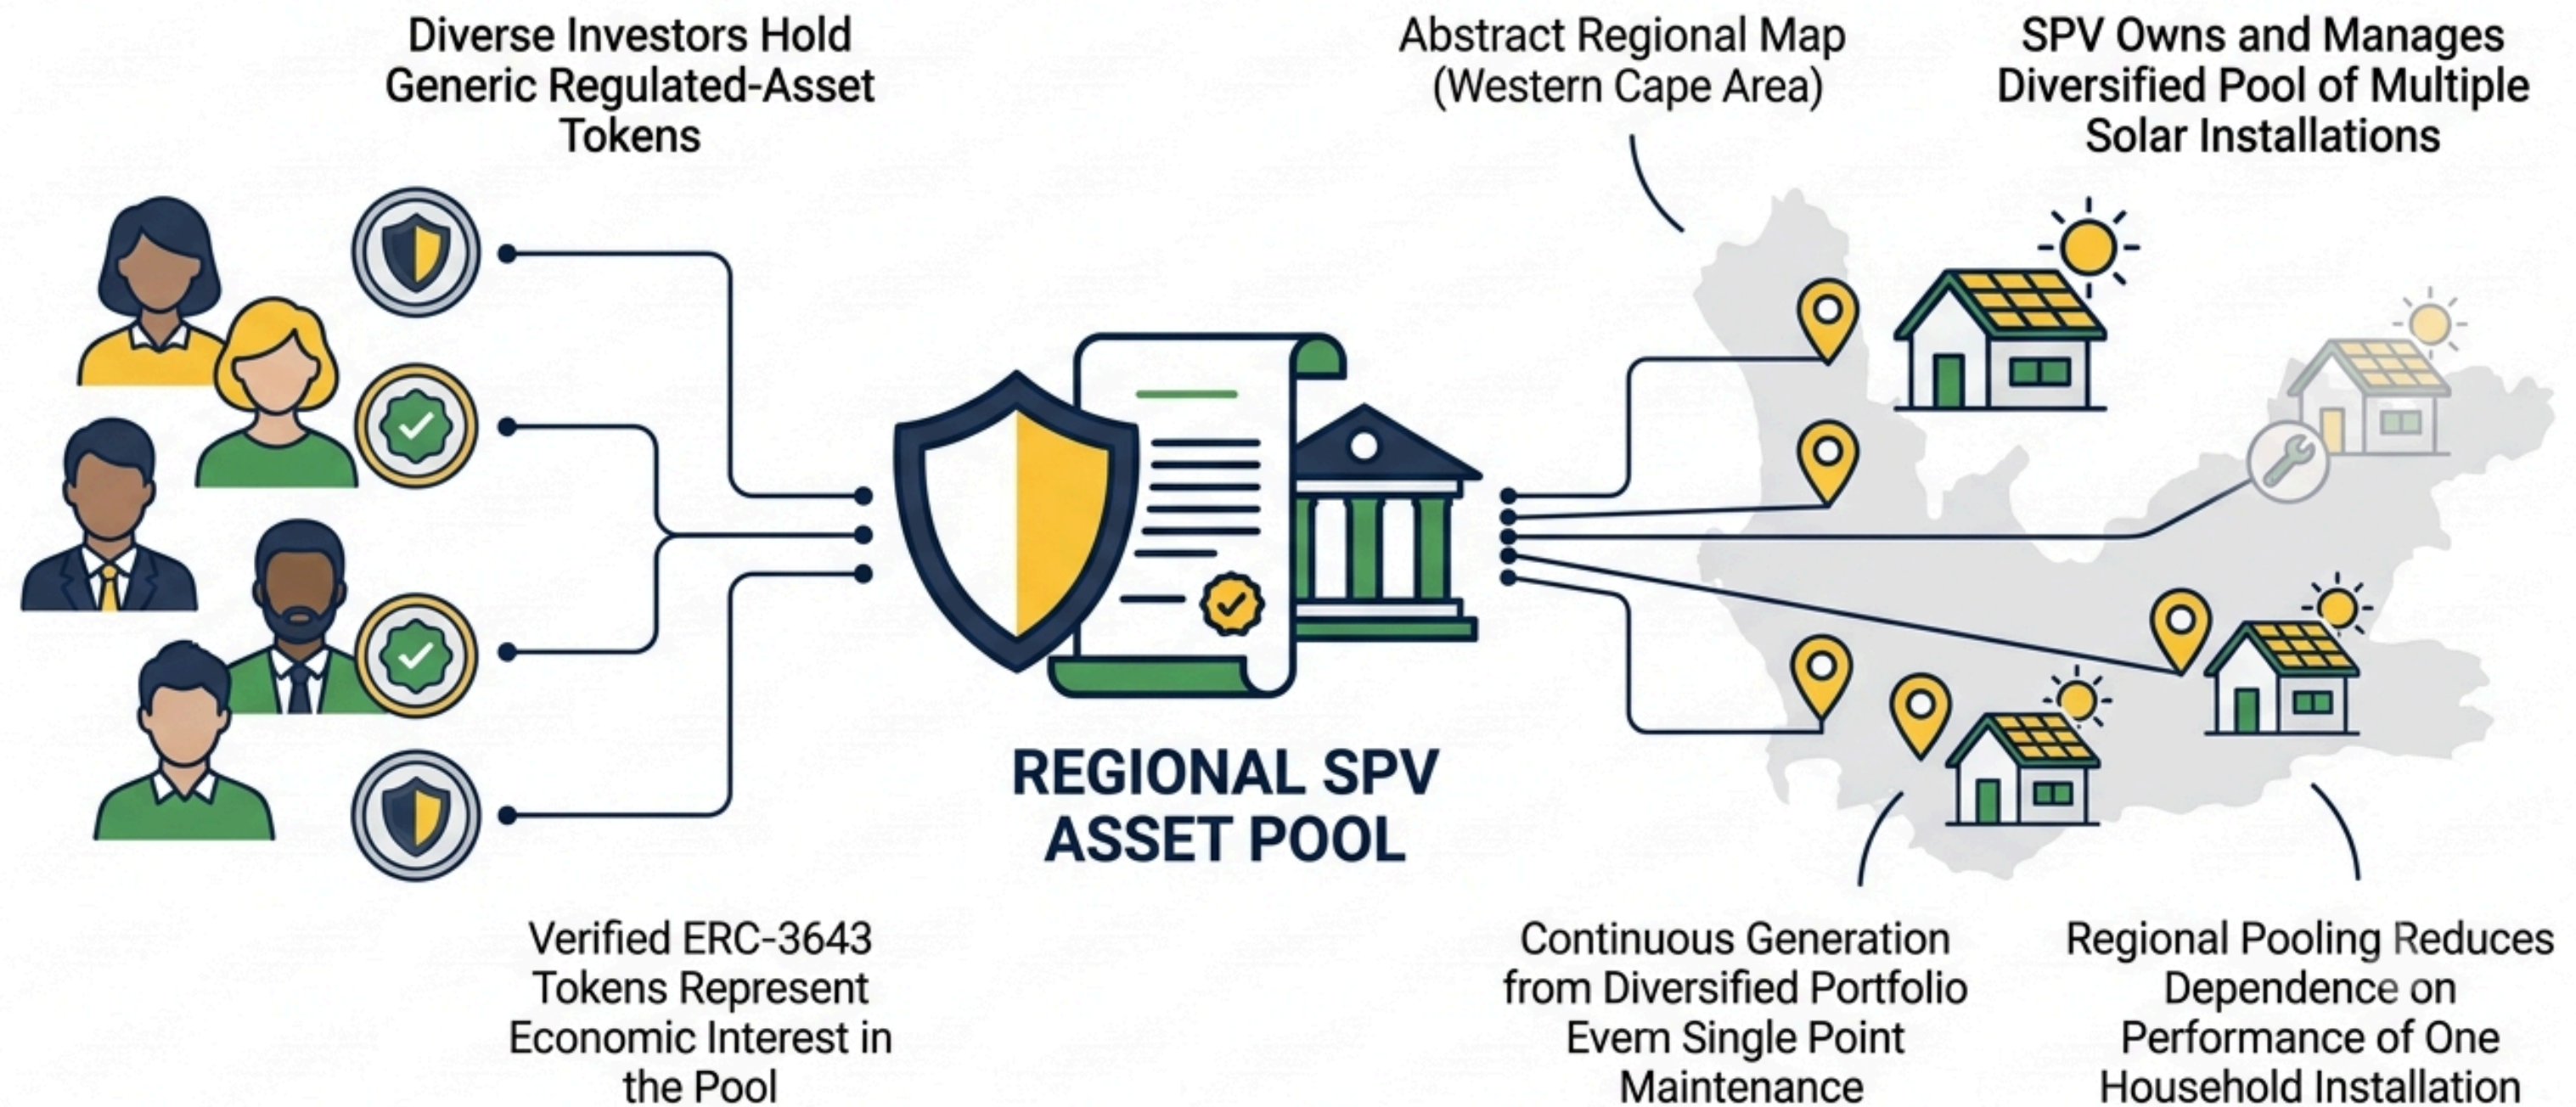

Traditional solar purchase

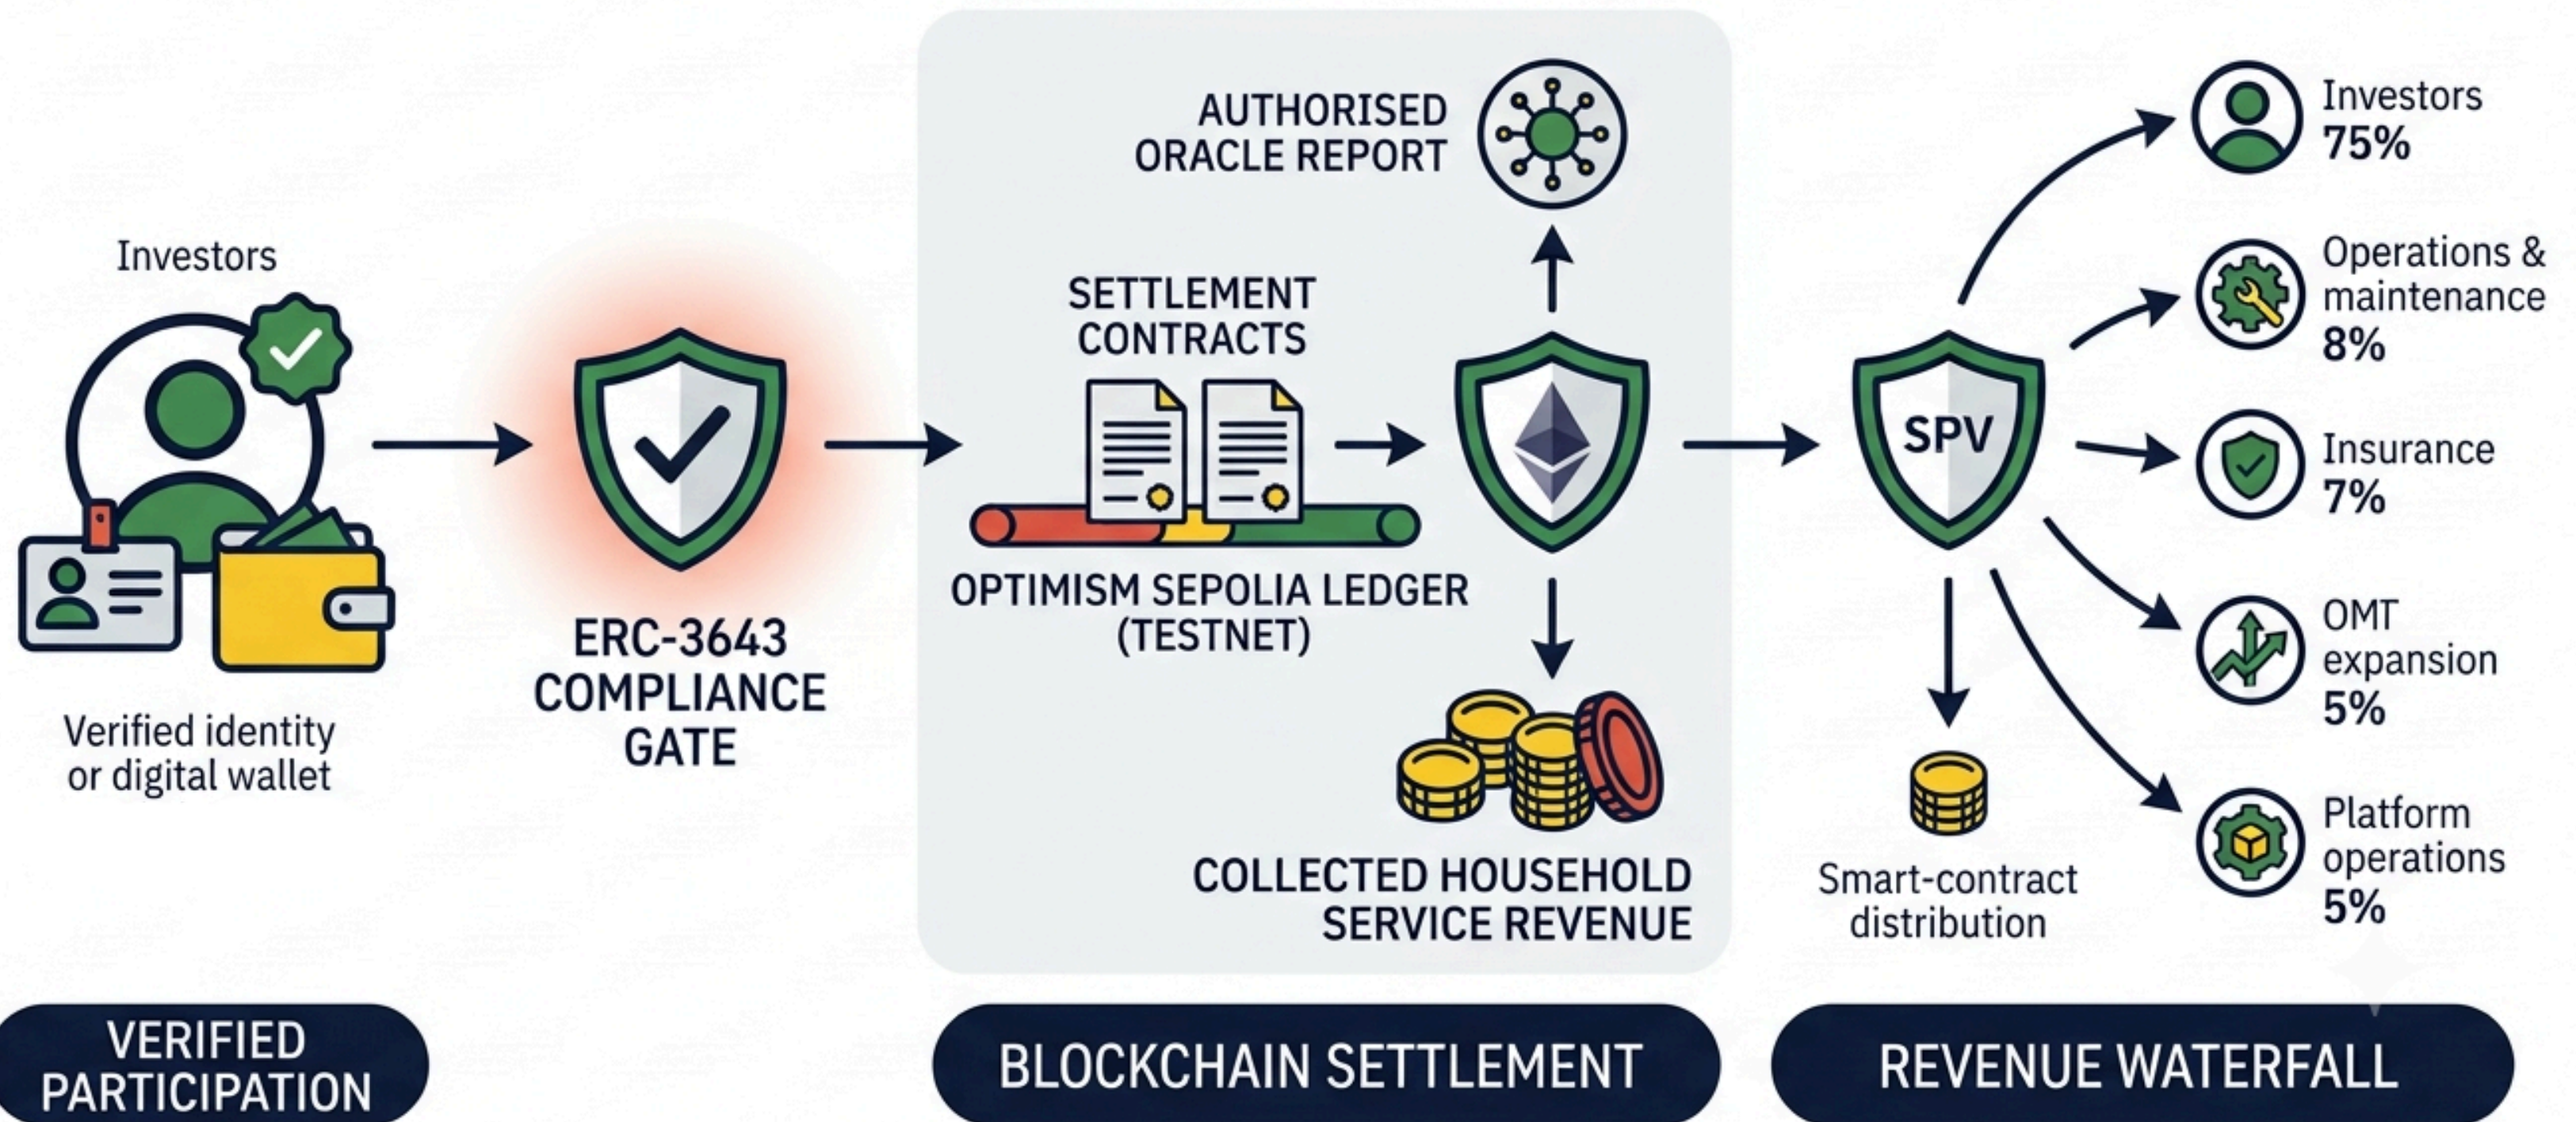

Veridien EaaS model

Regional asset pools for *Risk Diversification*

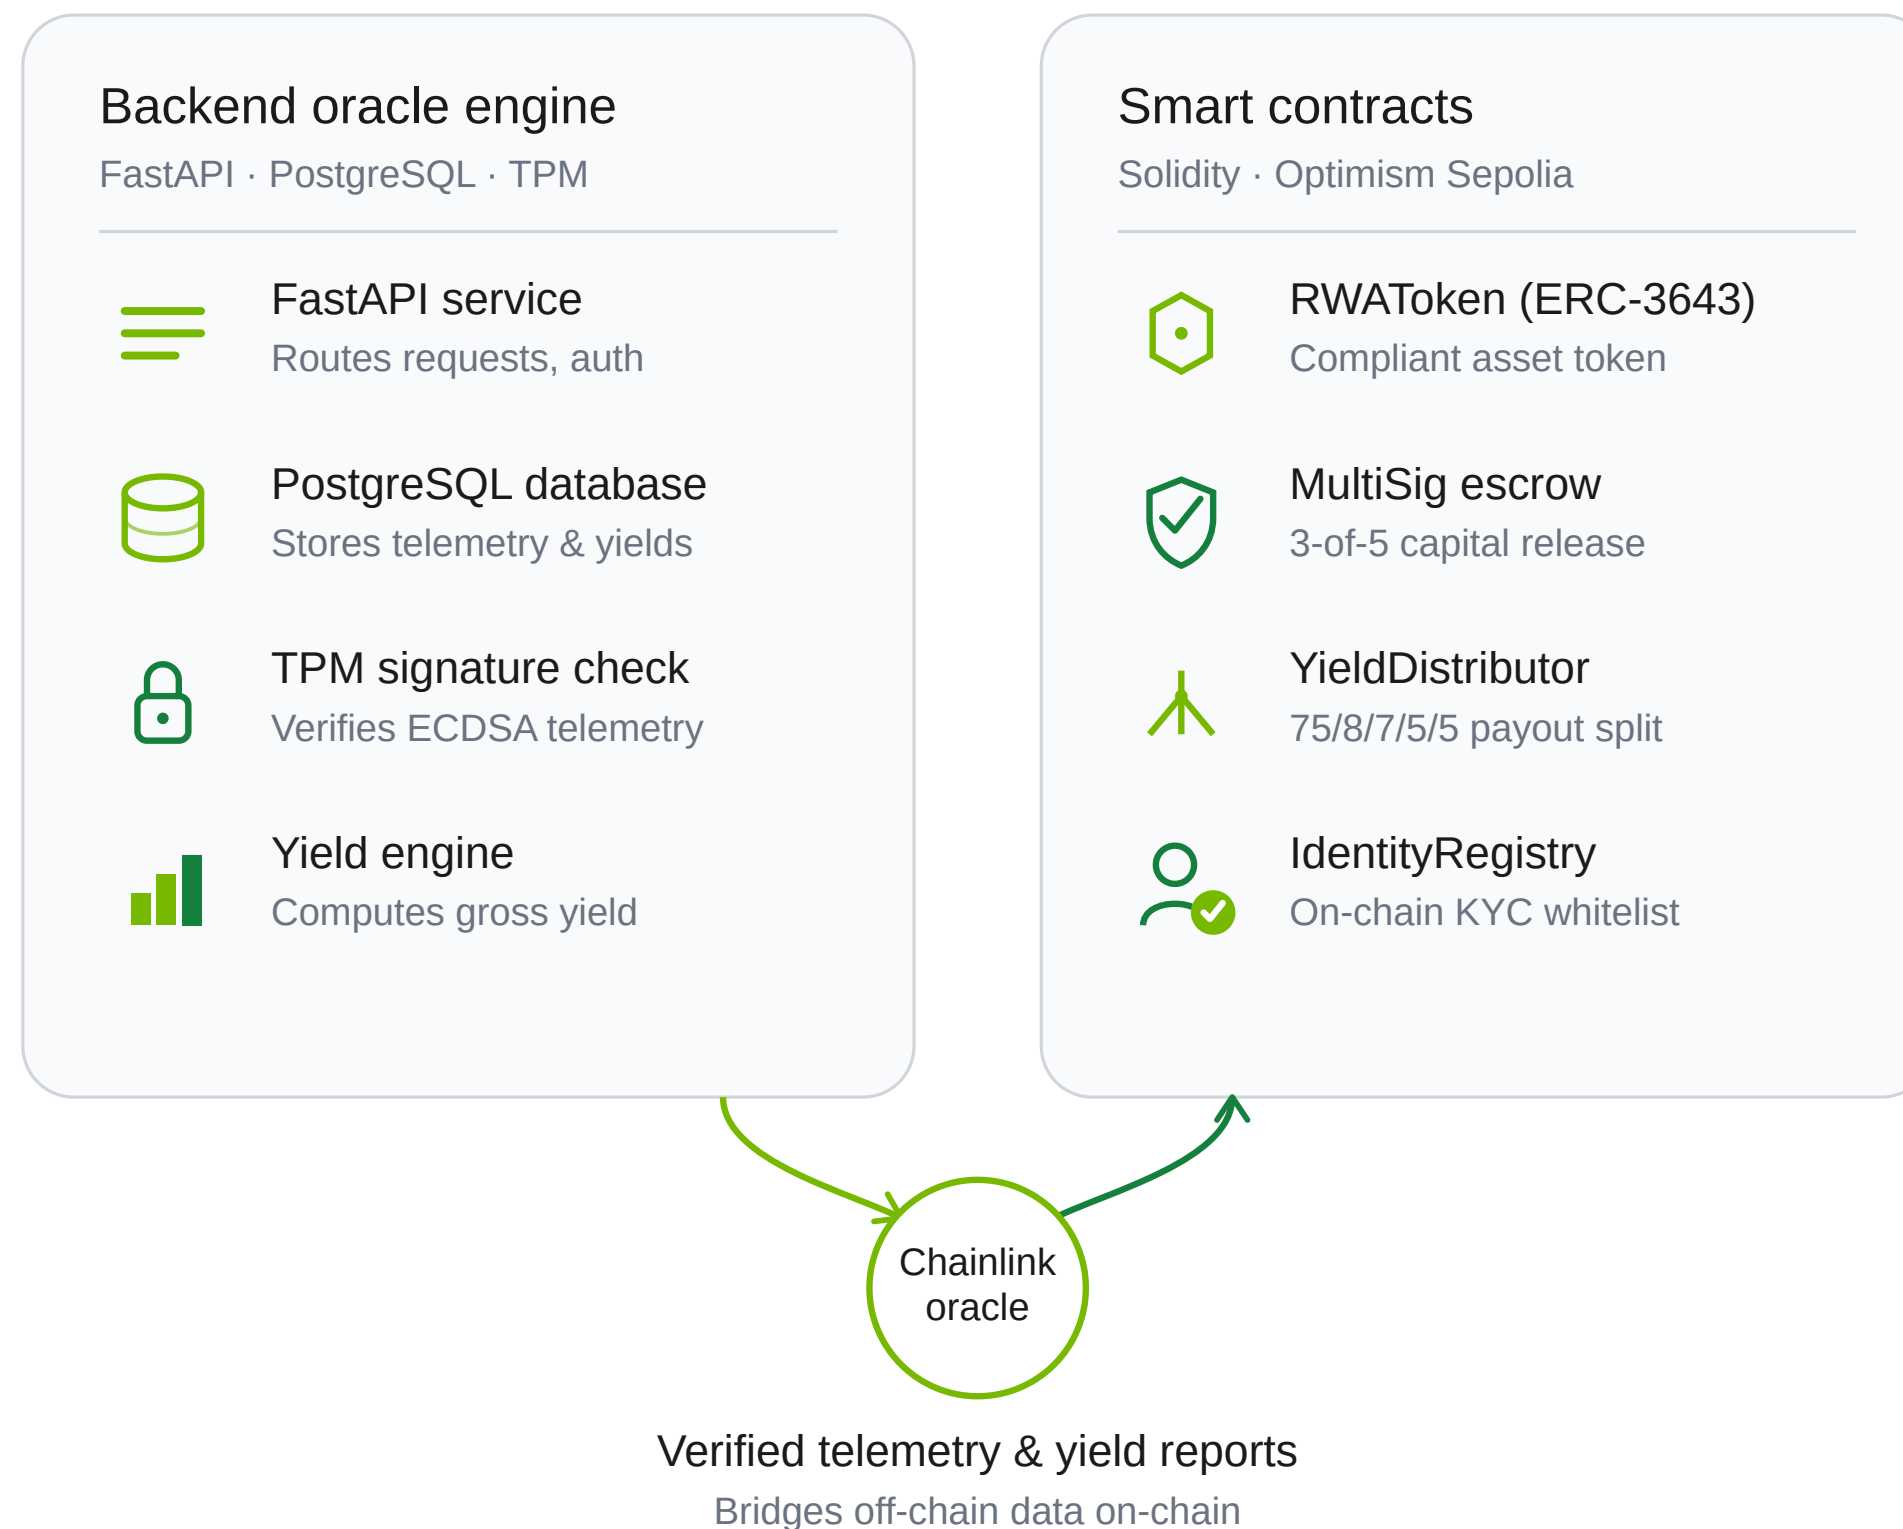

Technical *Compliance* and *Settlement* Solutions

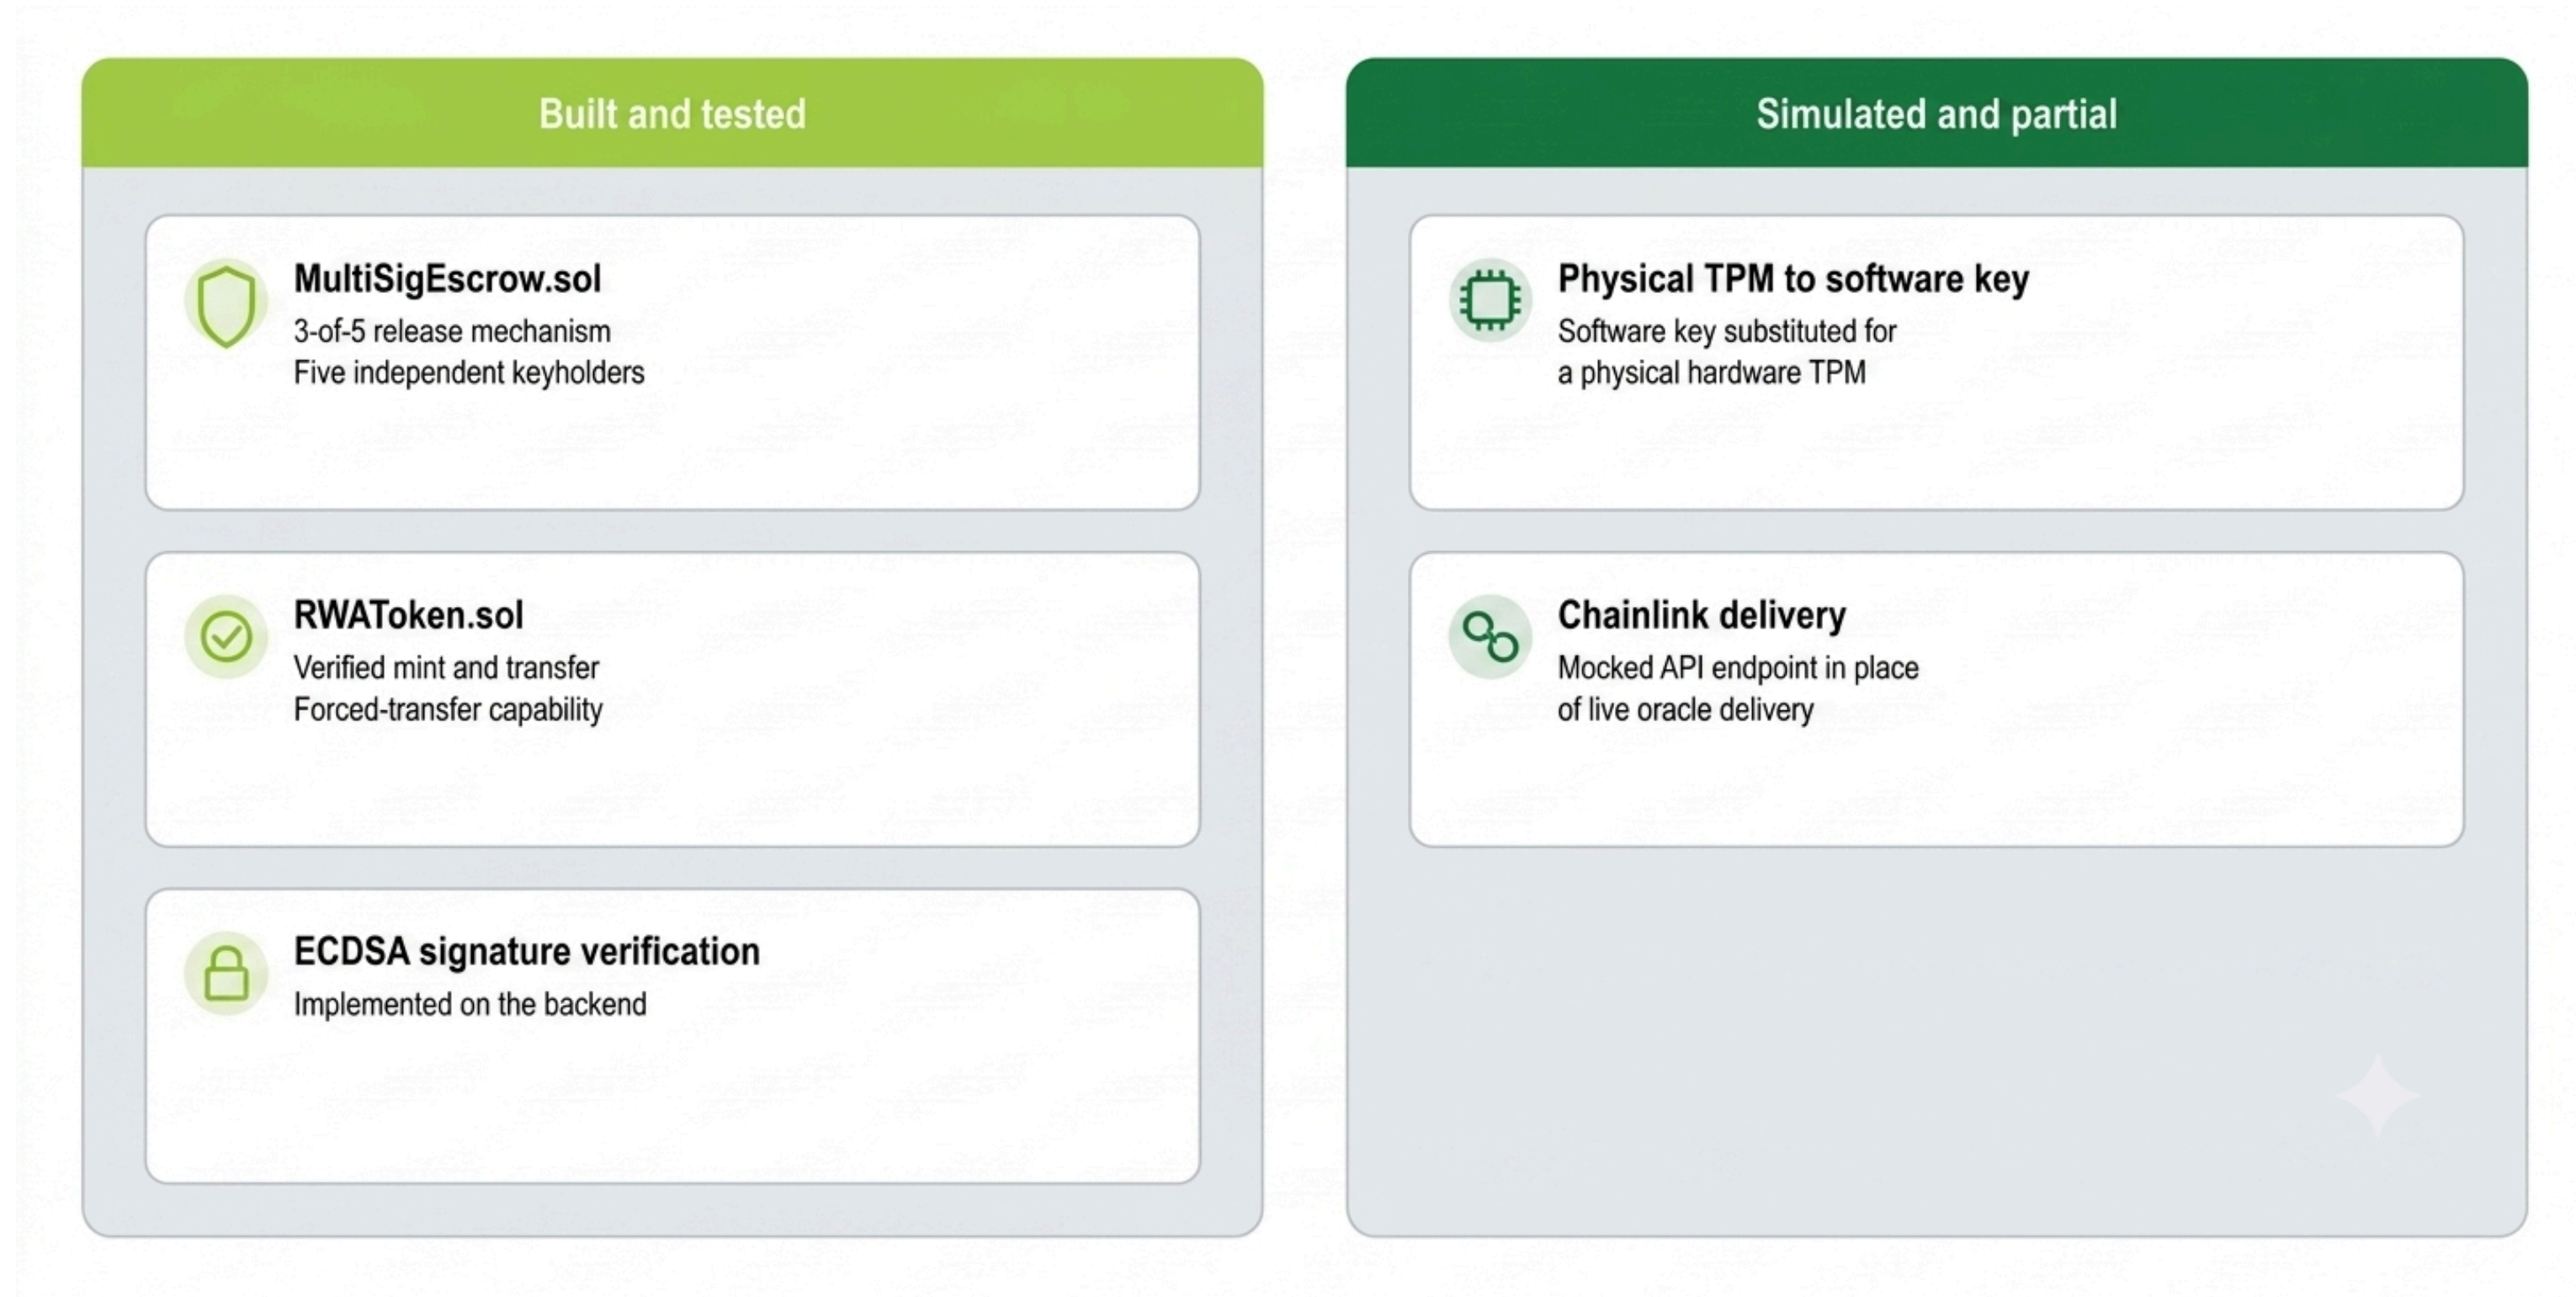

Off-Chain

On-Chain

What we actually built

Limitations

Escrow release and token minting are separate, unlinked transactions

Compliance registries exist but aren't yet wired into verification

Solar panel equipment is not part of the property

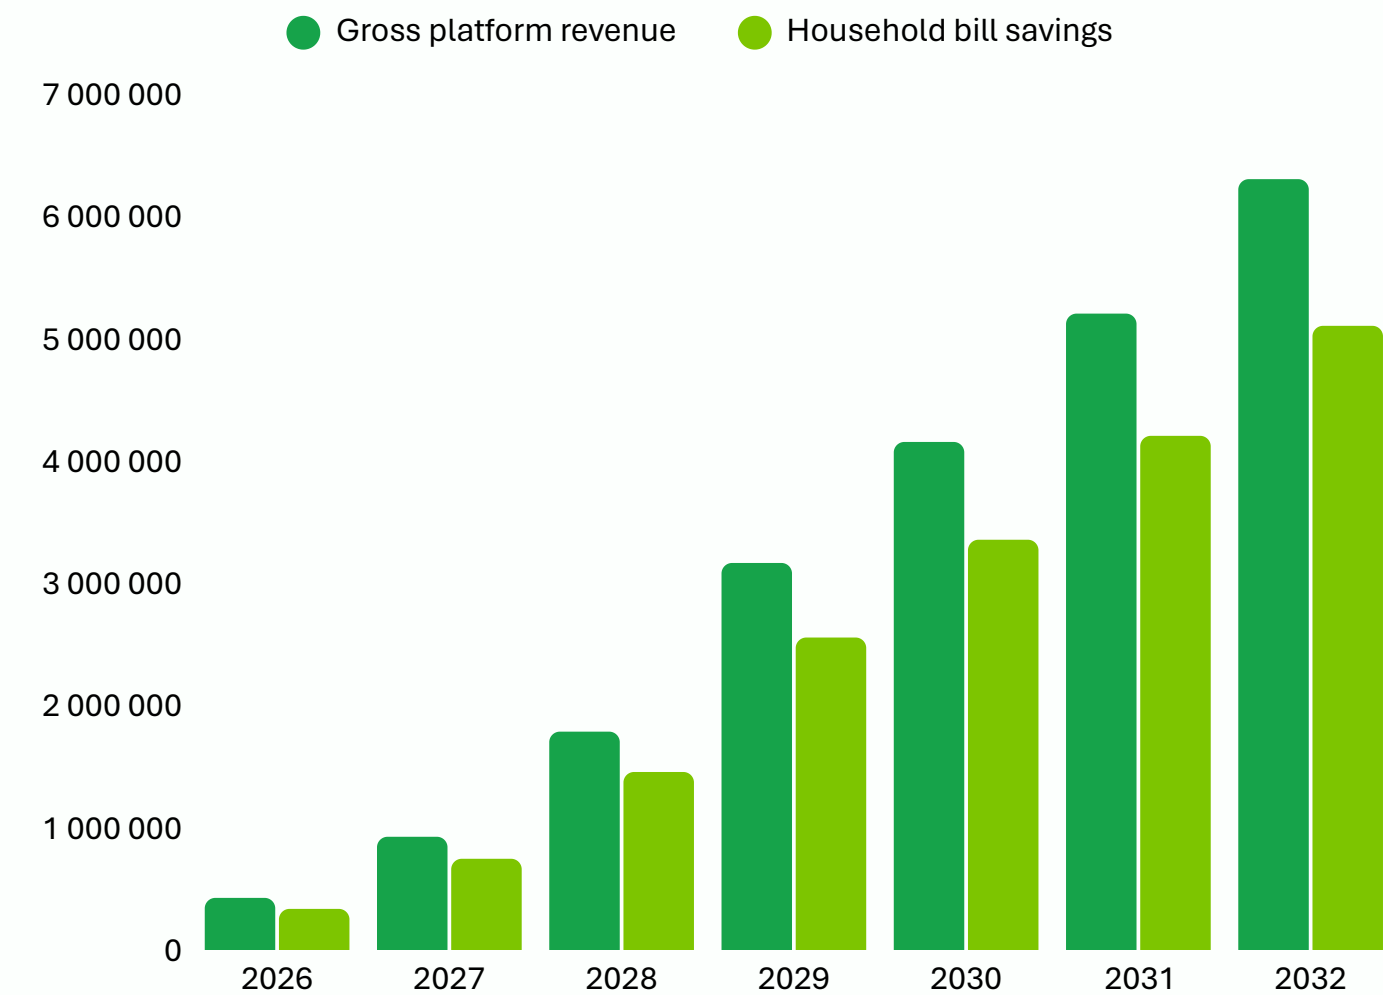

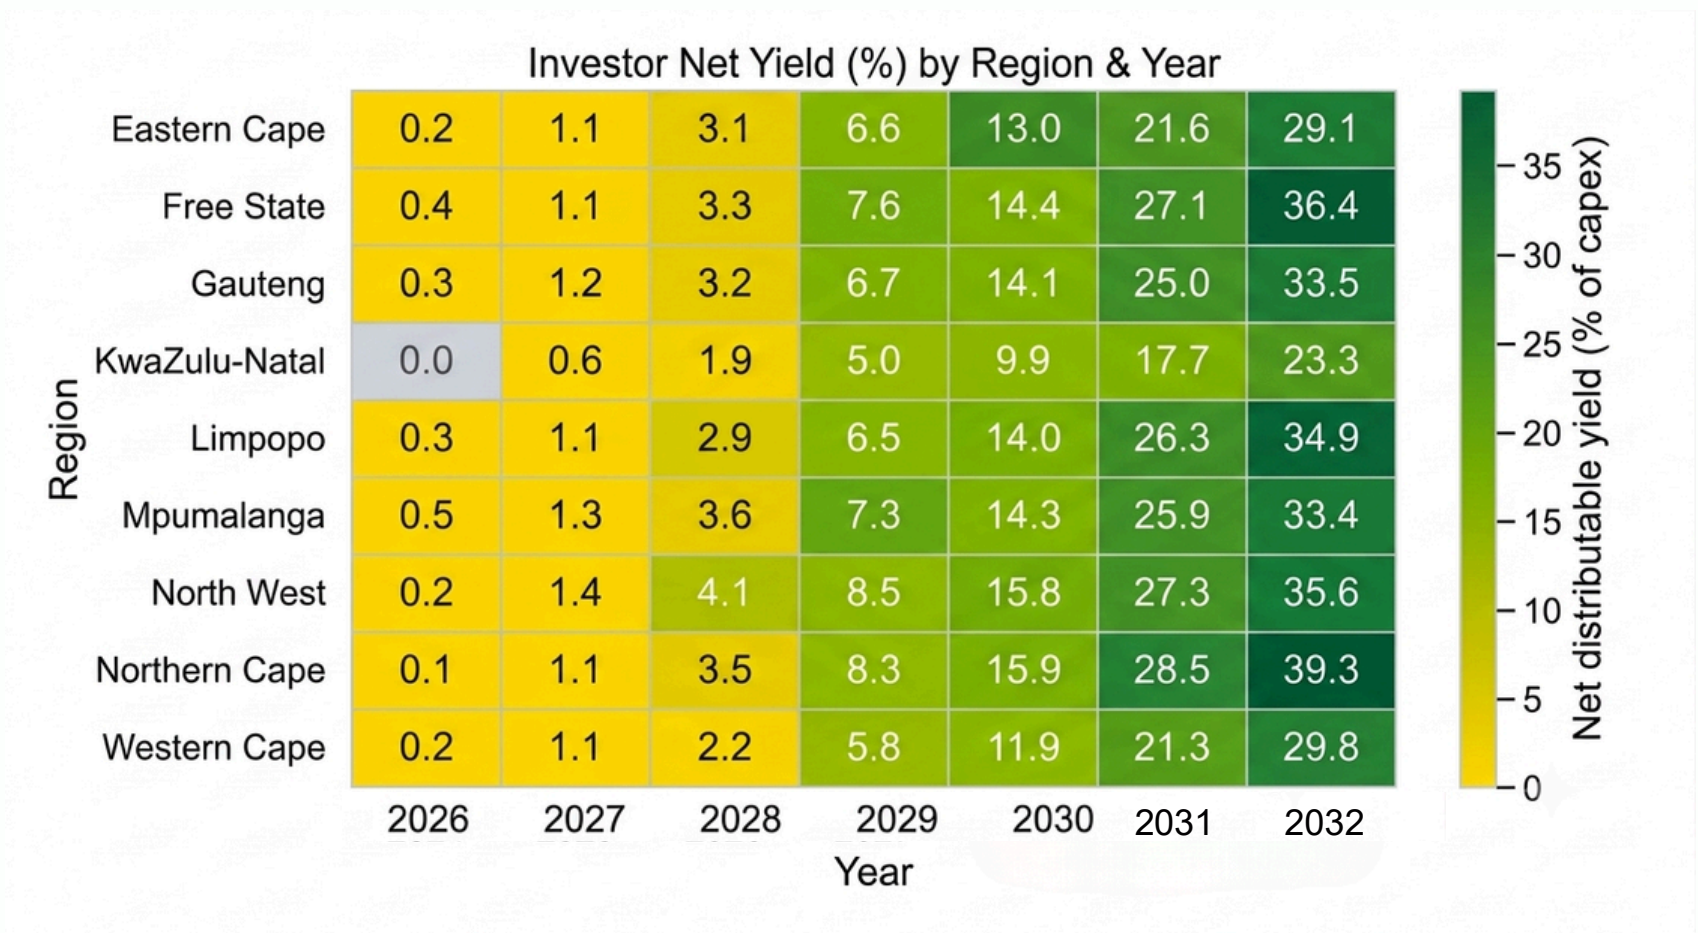

Yield is pushed to everyone monthly, instead of claimed on demand

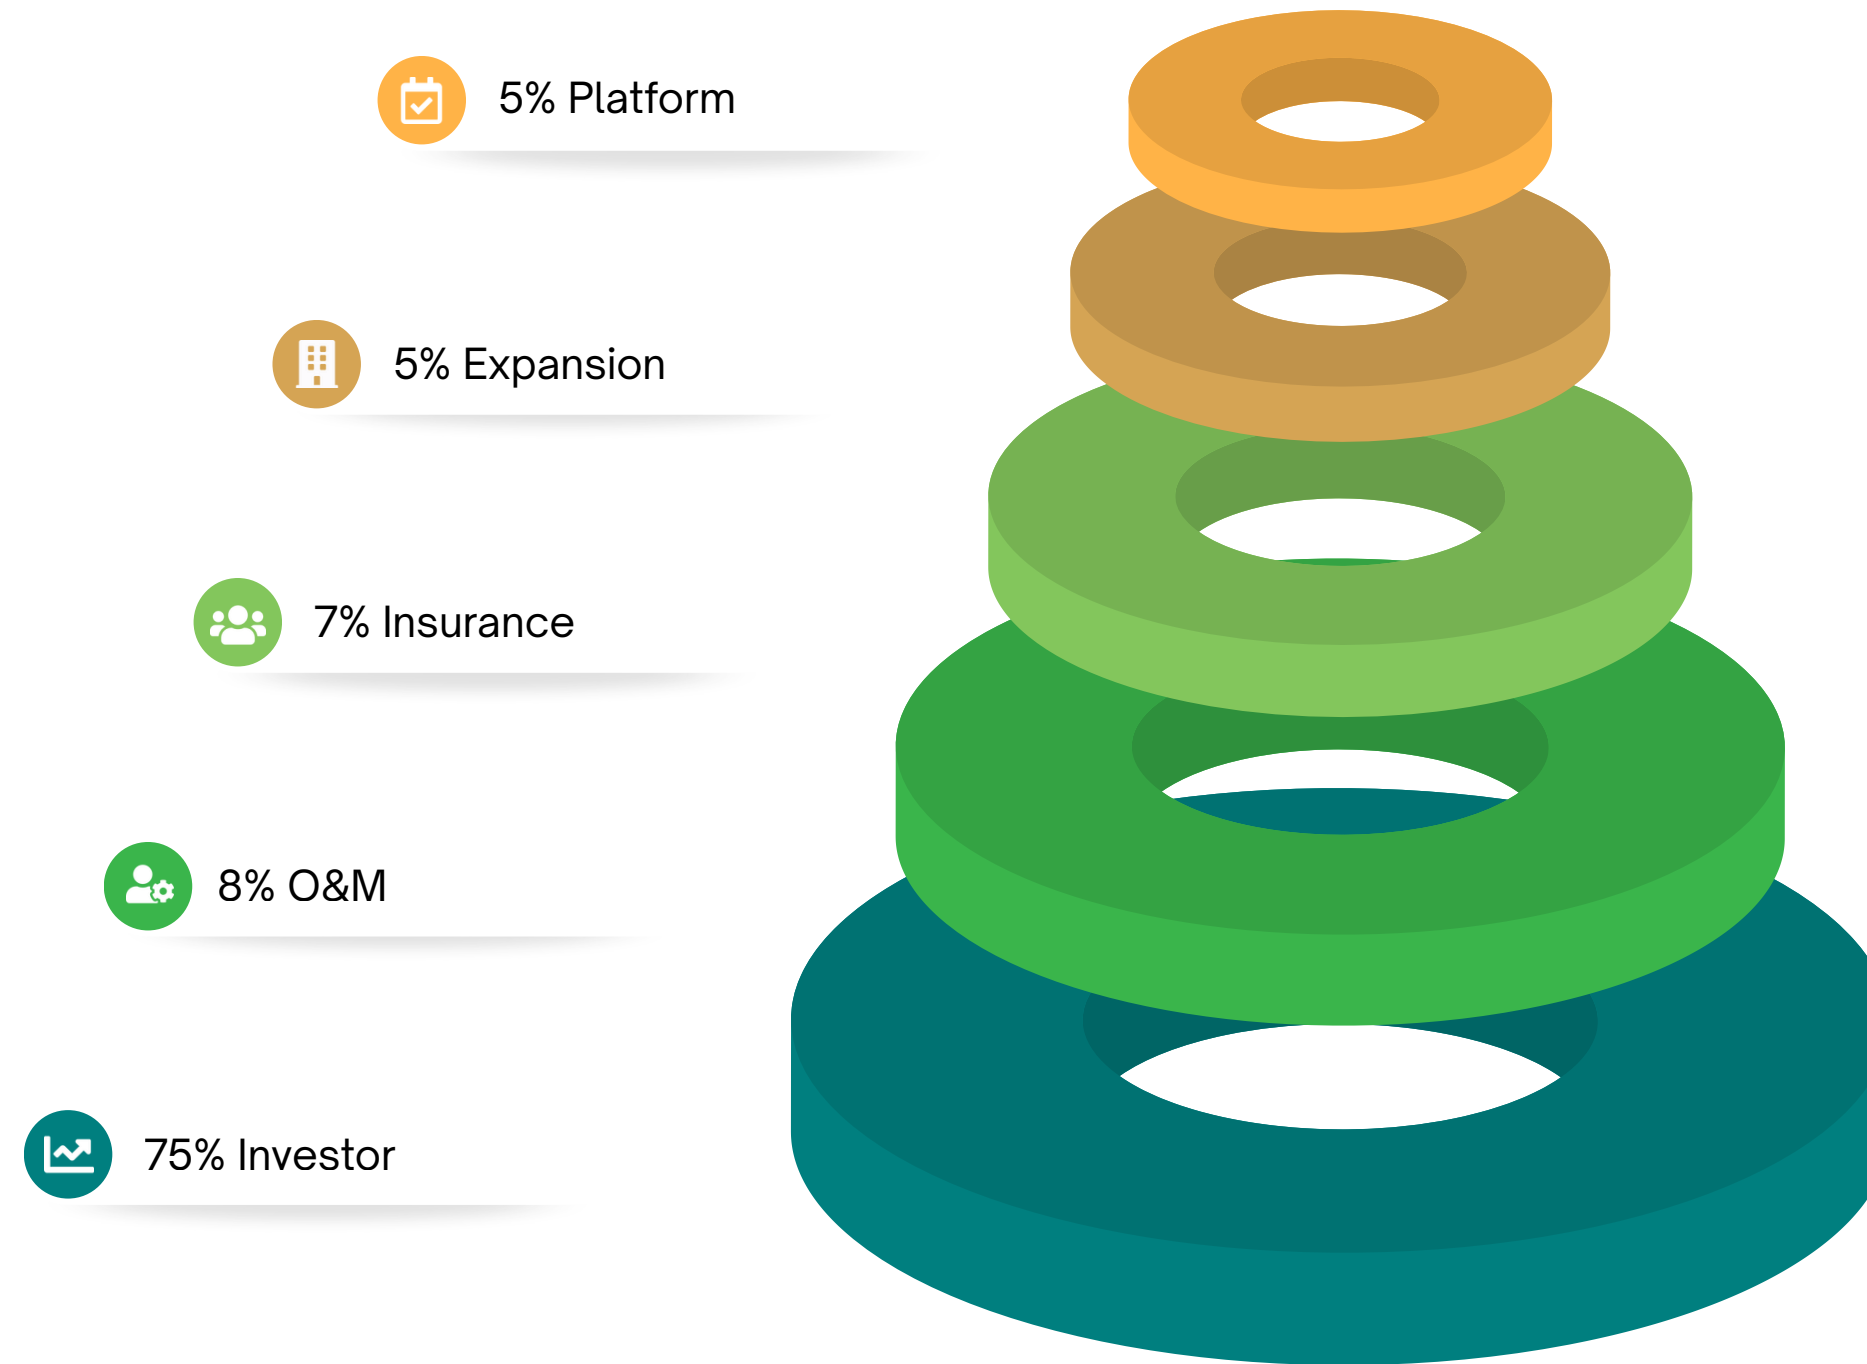

Business Model & Off-Chain Trust

20.7% Net Yield

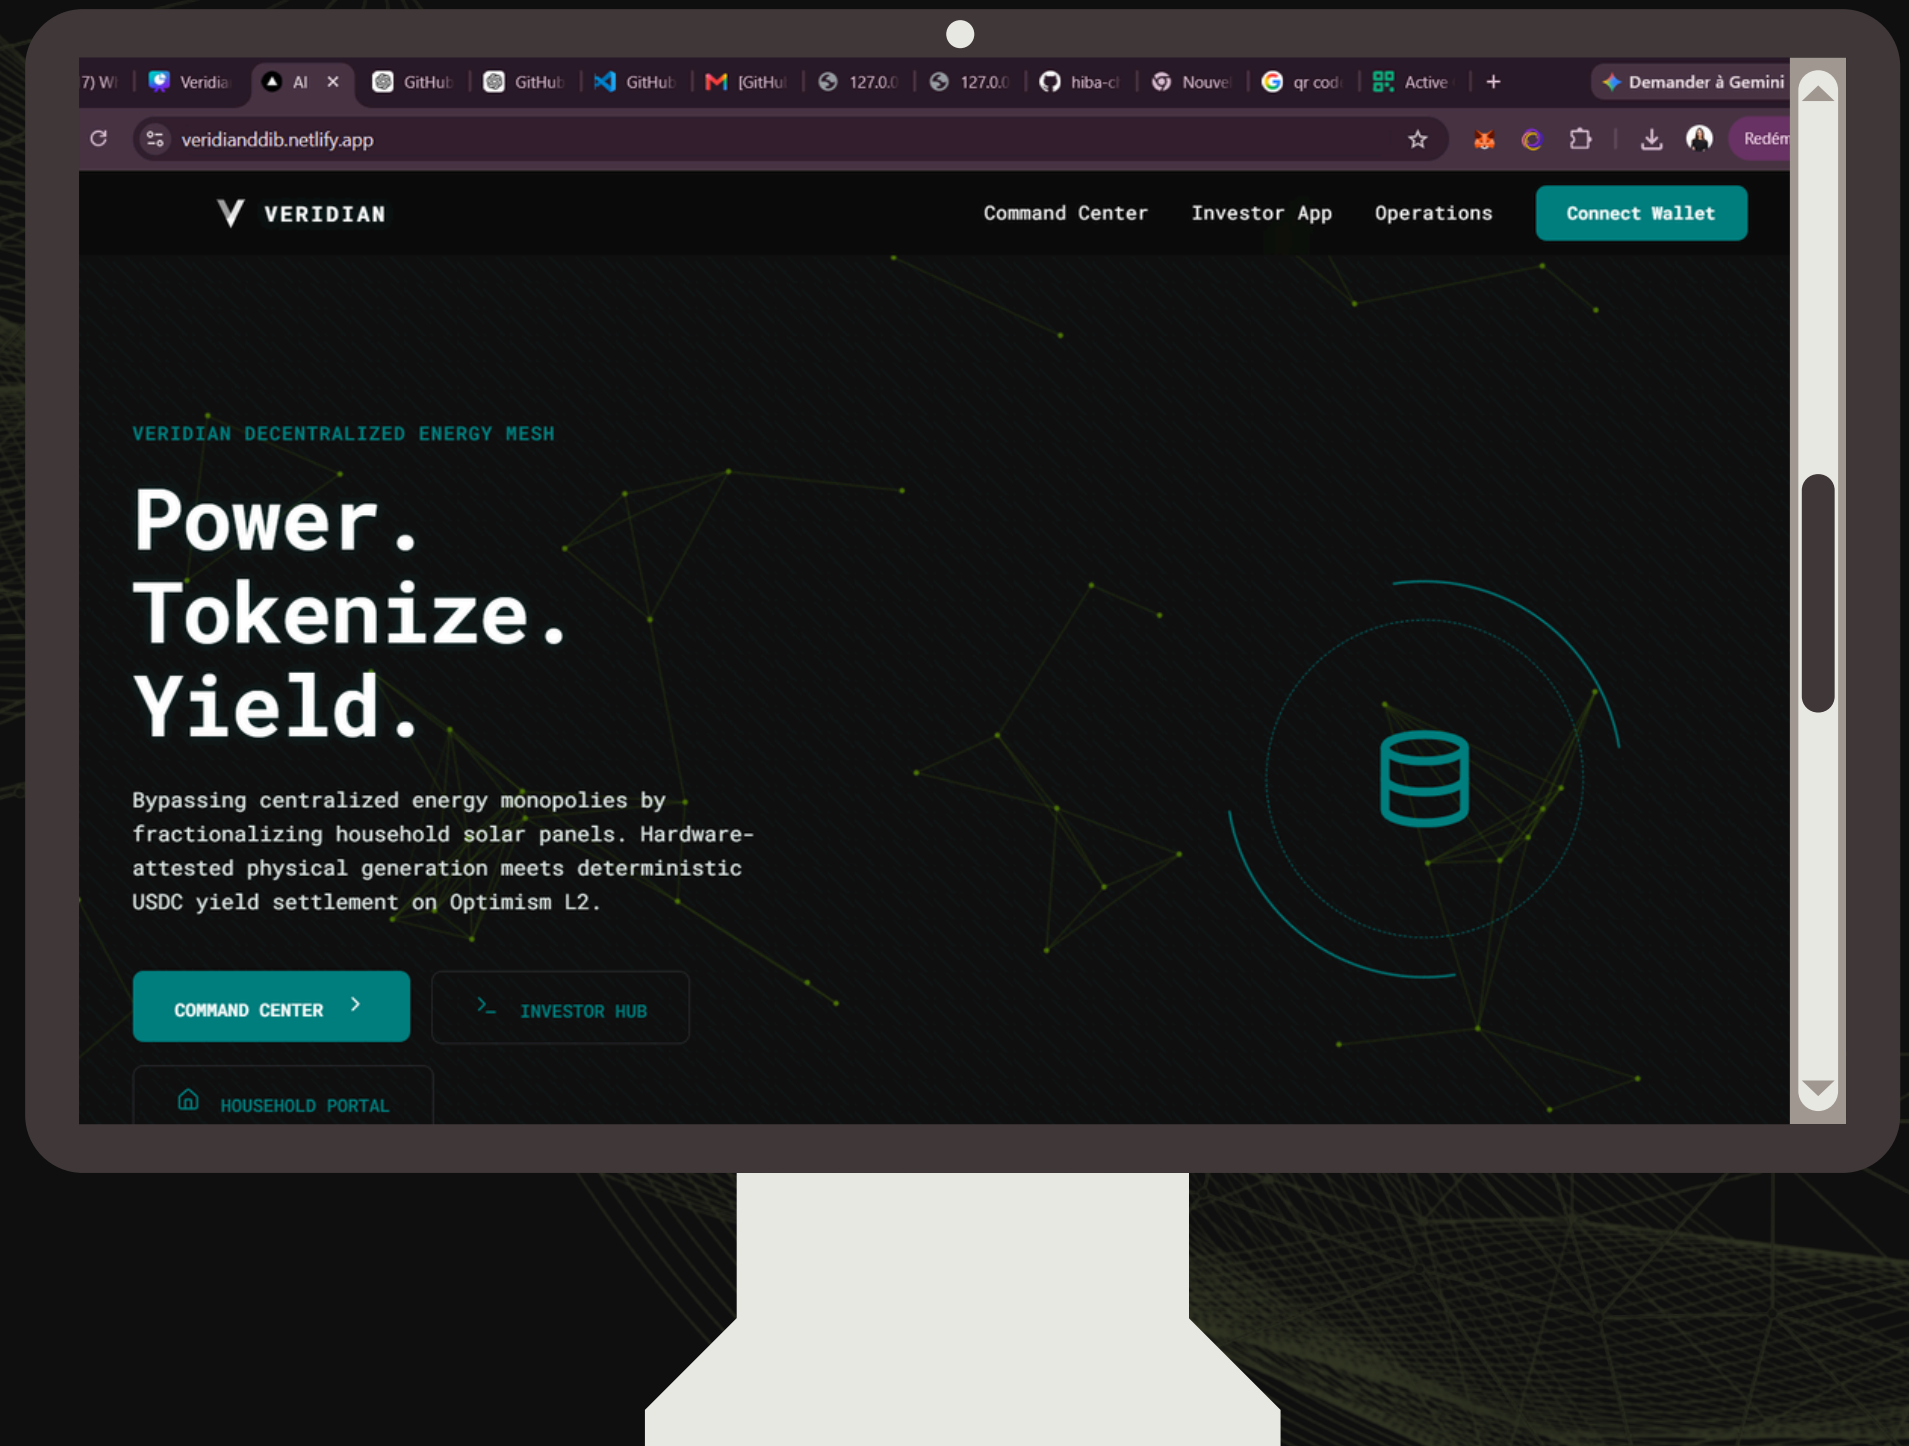

Business Model & Off-Chain Trust

Beyond Speculation: Real-World Value

Speculation & Hype

Highly volatile with no underlying utility.

Tangible Investment

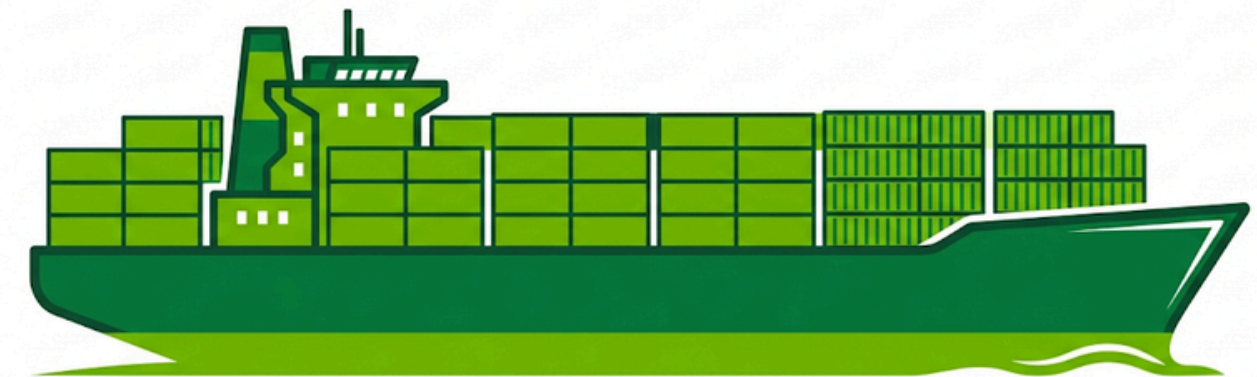

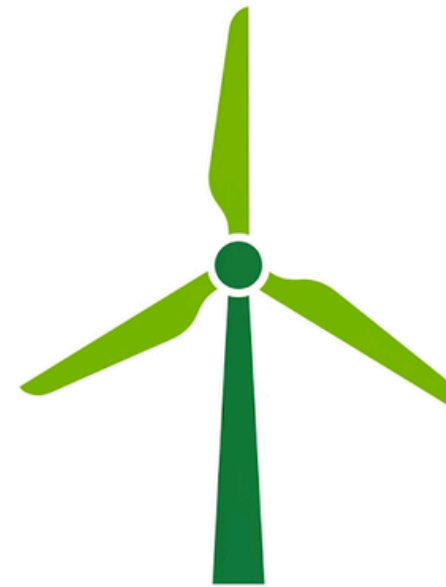

Backed by physical, income-generating infrastructure.

A Global Blueprint for Illiquid Assets

VERIDIAN PROTOCOL

Building the rails to tokenize the world's most critical infrastructure

Thank You

Building tomorrow's infrastructure for renewable investment
